# REHABILITATION GUIDELINES FOR PROXIMAL HAMSTRING TENDON REPAIR

### PHASE I (0-6 WEEKS) DATES:

Appointments	MD follow up at 10-14 days post-op
	Begin physical therapy 4-5 days post-op, 2-3x/week
Rehabilitation Goals	<ul> <li>Pain control</li> <li>Protection of repair</li> <li>Slow progress of hip ROM</li> </ul>
Precautions	<ul> <li>Touch Down Weight Bearing x 1 week with crutches</li> <li>PWB 50% x 2-6 weeks with crutches</li> <li>Hip ROM 0-45°x 1-2 weeks, 0-60 degrees 2-3 weeks, 0-90 degrees 3-6 weeks (all pain free)</li> <li>Knee ROM restrictions with brace locked in slight flexion will be stated by MD on case by case status seen in POC in operative report.</li> <li>No active HS contraction, No active hip extension x 6 weeks</li> <li>No hip flexion with knee extension x 6 weeks</li> </ul>
Suggested Therapeutic Exercises	<ul> <li>Quad sets, ankle pumps, active assisted hip and knee flexion/extension limit hip flex to 90 x 6 weeks</li> <li>Gait training in pool 2-6 weeks once incisions are fully healed</li> <li>SAQ, Standing and SLY hip abduction, calf raises</li> </ul>
Progression Criteria	Pain free hip flexion to 90°

#### PHASE II (6-12 WEEKS) DATES:

Appointments	Continue physical therapy 2x/week
Rehabilitation Goals	<ul> <li>Normalize gait pattern</li> <li>Pain free functional movements</li> </ul>

Precautions	<ul> <li>Progress to full weight bearing by week 8</li> <li>No dynamic stretching</li> <li>No impact or running</li> </ul>
Suggested Therapeutic Exercises	<ul> <li>AROM hip and knee flexion, HS curls and hip extension in antigravity</li> <li>Progress to weighted HS curls concentric/eccentric at week 10, increasing by 1lb per week up to 5lb</li> <li>Bridging, SLR anterior/posterior, clamshell, partial squats, double leg deadlift</li> <li>Balance and proprioception</li> </ul>
Cardiovascular Exercises	<ul> <li>UBE</li> <li>Stationary bike</li> <li>Progressive slow walking on level surfaces with increasing distance/time</li> </ul>
Progression Criteria	<ul> <li>Gait with no compensation on level surfaces</li> <li>Full hip and knee PROM all directions</li> </ul>

## PHASE IV (12-24 WEEKS) DATES:

Appointments	Continue physical therapy 1-2x/week
Rehabilitation Goals	<ul> <li>Full AROM hip and knee</li> <li>Begin CKC single leg exercises</li> </ul>
Precautions	Pain free strength training
Suggested Therapeutic Exercises	<ul> <li>Gentle HS stretching- active (the extender) and passive</li> <li>Bridge, single leg squat, single leg inverted hamstring curl/deadlift, walking forward/backward lunges</li> <li>Slow progression of agility, impact and plyometric x 24 weeks</li> </ul>
Cardiovascular Exercises	<ul> <li>Walking progression on level surfaces with gradual increase in speed/endurance</li> <li>Stationary bike progress to road biking on level surfaces</li> </ul>

	<ul> <li>Swimming with kick</li> <li>Progress walk to running with speed and agility during weeks 16-24, no sprinting until after 20 weeks.</li> <li>Jump training only after 24 weeks</li> </ul>
Progression Criteria	<ul> <li>Pain free walk/running with good mechanics, and no compensation</li> <li>Negative Askling-H hamstring test, tie your shoe test</li> </ul>
